

# Goals

## Javascript Overhaul

Completely review all Javascript - ES6  
Implement js projects

## Finance Application

Begin the brainstorm, design, and development of Prodigal, a personal finance application.

## React & Firebase

Continue & complete React course, begin implementing React projects with Firebase

## CodeWithJulia.codes

Continue Redesign, add mobile accessibility, write documentation and tutorials

# Javascript Overhaul

## What:

Completely review all Javascript - ES6  
Implement js projects

## Why:

Never felt I truly mastered JS, and I  
feel I need to strengthen my abilities  
with JSX

## How:

Read Javascript & JQuery front to back (adding notes)

Reviewing Javascript Udemy course

Create more projects with vanilla javascript

## Action:

Spend 30 minutes every morning  
on specific JS work

## When:

Everyday for next 4+ months

# React & Firebase

## What:

Continue & complete React course, begin implementing React projects with Firebase

## Why:

React is super powerful and I've loved working on it and want to continue improving my skills.

## How:

Continue React Udemy Course

Watch youtube videos on building web apps

Learn how to use firebase to manage React

## Action:

Spend 2-3 hours daily working on React, and then eventually spending some of that time using Firebase

## When:

Everyday for next 4+ months

# Finance Application

## What:

Begin to brainstorm, design, and develop of Prodigal, a personal finance application.

## Why:

I have a unique idea for finance management and I need to apply my skills in React.

## How:

Begin Designs in Adobe XD

Build hosting and server side work

Implement React framework to deploy app

## Action:

Spend 5 hours weekly on continuing these ideas and the development process

## When:

Work almost daily until the app is deployed

# CodeWithJulia.codes

## What:

Continue Redesign, add mobile accessibility, write documentation and tutorials

## How:

Begin Designs in Adobe XD

Implement designs onto site

Write out Documentation & Tutorials

## Action:

Spend 3 hours weekly on continuing these ideas and the development process

## Why:

This will be a great site to share easy to read documentation and tips

## When:

Work weekly on this project until its release, then continuously add content bi-weekly.
